Letter of Interest

Dear Dr. Federici,

On behalf of Trend in Africa, I am writing to state our interest in establishing a collaboration in between Trend and your lab, more specifically in Open Source technologies and their applications to education and development of laboratory equipment.

In this collaboration, we could organize "Open Labware" workshops to be hosted in Latin America where participants would have hands on modules, allowing them to build research equipment and become active members in the open source community. Moreover we are interested in scheduling smaller visits, where one or two persons would visit a lab to exchange expertise.

We are very much looking forward to potential future collaborations.

Sincerely yours,

André Maia Chagas
